September 20, 1995

TO: Minerals File

FROM: Lynn Kunzler, Reclamation Specialist

RE: Site Inspection, Ron Farnsworth, Building and Limestone Mine, S/039/005, Sanpete County, Utah

Date of Inspection: September 15, 1995

Time of Inspection: 7:30am

Conditions: Clear and sunny

Participants: Ron Farnsworth, Operator; Lynn Kunzler, DOGM

Purpose of Inspection: To evaluate status of the site

Ron indicated this site was worked a few years ago. He basically took a small amount of stone to run tests on. An area about 25' x 25' was disturbed, most of which has revegetated. There is a small pile of topsoil at this site which will be respread and seeded this fall. At the current time he has no plans to further develop this site in the next few years. He will indicate that the site was reclaimed on the annual report.

Upon return to the office, it was noted that the School and Institutional Trust Lands Administration terminated the lease for this site last year. Therefore, after the small soil pile is regraded and seeded, and upon receipt of the annual report, this file can be closed.
